Test 1 - Grade Summary

Name: _____

#	Possible	Earned
1	10	
2	10	
3	25	
4	25	
5	30	
Bonus	10	
Total:	**100**	

- Each question is graded based on the criteria below.
- I try to use the criteria to your advantage, I don't use it to hammer you.
- The big picture is that I look at a question and decide if it's A,B, C, D or F work.
- If the criteria benefits you, I use it.
- If it doesn't, I assign a letter grade to your answer, and take points accordingly.
  - Example: A work = logically correct, and syntactically good (maybe a forgotten semi-colon)
  - B work: logically ok (mostly works), syntax is still decent.
  - C work: logically meh,
  - you get the picture

For questions 2-5:

- Minimum class syntax correct: 10%

```
class name{
private:
public:
};
```

- Appropriate data members and types chosen for class. 25%
- One or more constructors included and appropriately formatted. 25%
- No implementation unless asked. 15%
- Min Required Setters and Getters included in answer. 25%
